

MAKE YOUR OWN PATCH

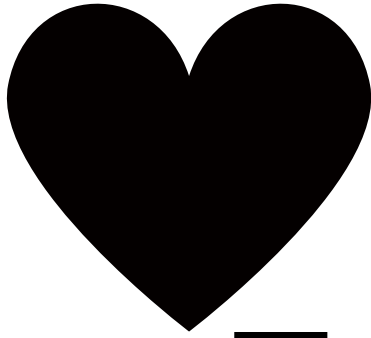

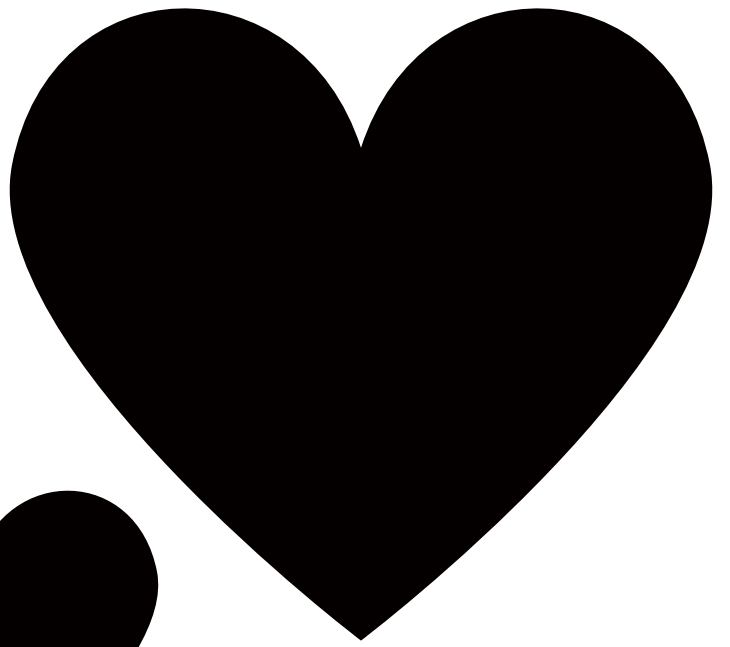

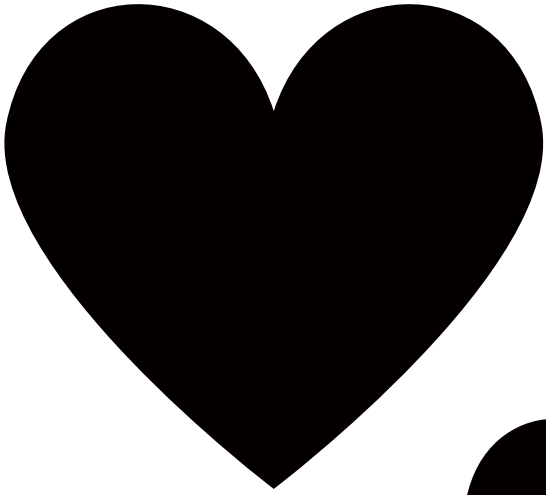

Little by little... step by step

- Print and cut your shapes/templates
- Trace your shapes onto the adhesive liner (looks like baking paper)
- Place adhesive on the wrong side of the fabric to be bonded (paper liner should face up)
- Place and hold iron on the paper liner for until entire surface is bonded (5-15 Seconds). Allow to cool.
- Cut your shapes - the adhesive will now be attached to your fabric piece.
- Peel off paper liner.
- Place material, adhesive side down, on top of project/Source
- Press and hold iron for on each section until entire piece is bonded. (5-20 Seconds)
- Avoid repeated or excessive ironing to the area after fusing
